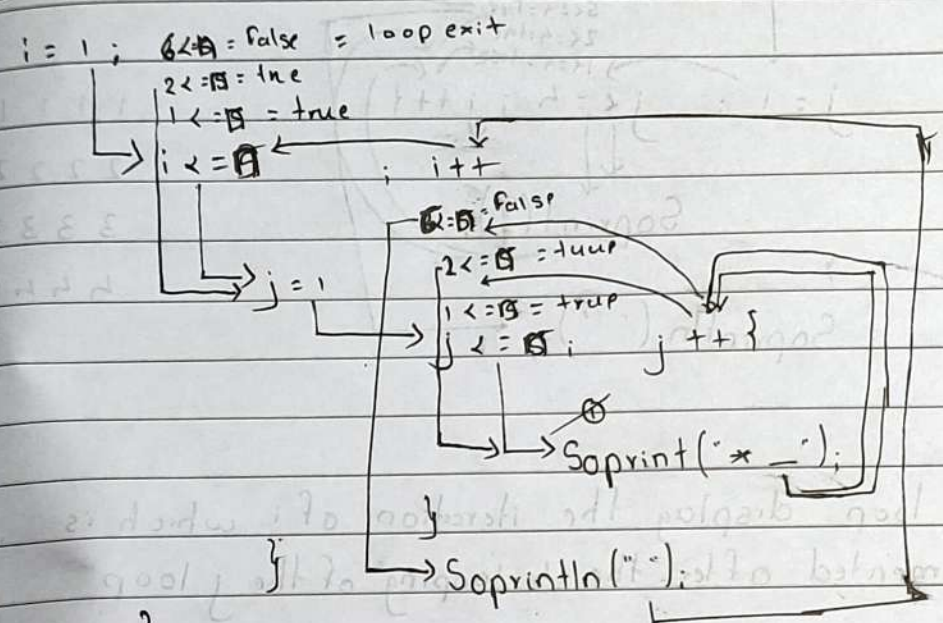
Assignment - 01

* Q.1 take input n from user for

→ n = 5 ; n × n = 5 × 5

```
* * * *
* * * *
* * * *
* * * *
```

* Dry Run:-



```
* * * * *
* * * * *
* * * * *
* * * * *
* * * * *
```

```
import java.util.*;

public static void main (String [] args) {
    Scanner sc = new Scanner (System.in);
    int n = sc.nextInt(); = 5

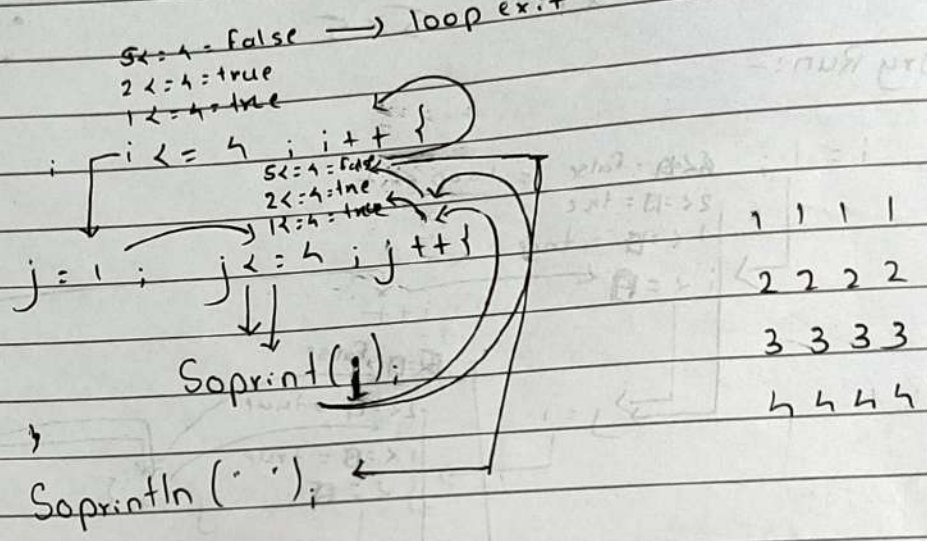
    for(int i = 1; i<=n ; i++){
        for (int j = 1; j<=n; j++){
            System.out.print("* ");
        }
        System.out.println(" ");
    }
}
```

Inner loop represent no of the columns while outer loop represents the no. rows.

Q2. Print Pattern

```
1 1 1 1
2 2 2 2
3 3 3 3
4 4 4 4
```

→ * Dry Run



* Outer loop display the iteration of i which is incremented after the 4 looping of the j loop

Inner loop display the i of n iteration.

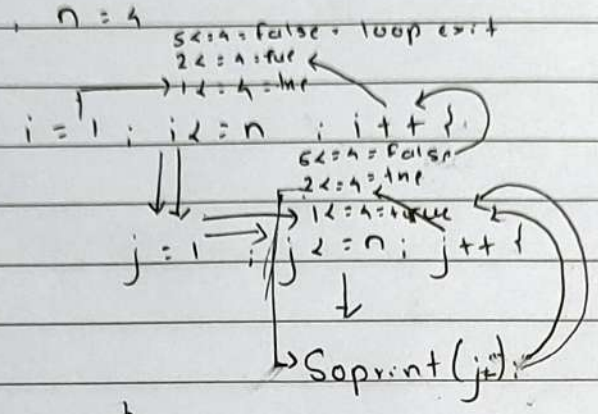
* Code

```
public static void main (String [] args){
        for(int i = 1 ; i<=4 ; i++){
                for (int j = 1 ; j<=4 ; j++){
                        System.out.println (i+"");
                }
                System.out.println(" ");
        }
}
```

Q3. Print Pattern , n = 4

```
1 2 3 4
1 2 3 4
1 2 3 4
1 2 3 4
```

* Dry Run , n = 4



```
1 2 3 4
1 2 3 4
1 2 3 4
1 2 3 4
```

```
}
Soprintln(" ");
}
```

* Outer loop iterates till n = 4 and Inner loop print the j while loops from 1 to n = 4.

Code.

```
import java.util.*;

public static void main(String[] args){

    Scanner sc = new Scanner(System.in);

    int n = sc.nextInt(); //=4

    for(int i = 1; i<= n; i++){

        for(int j = 1; j<=n; j++){

            System.out.print(j + " ");
        }
        System.out.println(" ");
    }
}
```
